# Lenox Pub

Dear Lenox Pub team, please find below a tutorial on how to connect from the Lenox VM to the Lenox Private VM.

Lenox Pub Infrastructure schema

As you can see, the Lenox Private VM is not accessible via direct connection due to its private network. To connect to the Lenox Private VM, you must go through the Lenox VM. As you know, the Lenox Private VM is used for invoice storage. Please use the following command to access the Lenox Private website :

```
ssh -i /.ssh/idrsa -L 8080 :10.0.1.10 :80 webadmin@<lenox-vm-ip>
```
